Product Management

B2B SaaS

CRM Integration

Dhiraj Sinha

Senior Product & Engineering Leader | Enterprise B2B SaaS |
Salesforce · HubSpot · Dynamics | 30+ Team | Global Stakeholders |
Agile · Roadmap · PRD | 15+ Yrs

Bhilai, Chhattisgarh, India

Summary

I build and scale enterprise B2B SaaS products from strategy and roadmap to cross-functional delivery and customer adoption. Over 15+ years, I've progressed from business analysis and product consulting into senior product and engineering leadership for international software organizations. Today, I lead 30+ engineers and support staff in India for LeadAngel, a US-headquartered enterprise SaaS company. I partner directly with founders and US leadership to define product strategy, PRDs, prioritization, and release plans for a platform integrated with Salesforce, HubSpot, and Microsoft Dynamics. What I deliver in complex, global environments: → End-to-end product ownership — discovery, roadmap, sprint planning, QA governance, and go-live → Alignment between global stakeholders and India engineering — clear decisions, faster execution → Enterprise workflow automation and CRM integration at scale → People leadership — performance cadence, workload planning, and cross-functional accountability Results: improved delivery velocity and product quality by 35%; reduced executive feedback cycles from weeks to days through structured Agile operating rhythms. I am passionate about high-performing product organizations and enterprise software that customers rely on. Happy to connect with product, engineering, and technology leaders building at global scale.

Experience

LeadAngel

Senior Product Manager | India Operations

May 2024 - Present (2 years 2 months)

Bhilai, Chhattisgarh, India

- Lead product and engineering operations for a US-headquartered B2B enterprise SaaS platform, managing 30+ engineers and support staff across India.

- Primary interface between US founders/executive stakeholders and India engineering; translate priorities into PRDs, quarterly roadmaps, and release plans.
- Own product strategy for automated lead assignment and enterprise CRM integrations (Salesforce, HubSpot, Microsoft Dynamics).
- Improved delivery velocity and product quality by 35% through Agile sprint planning, release governance, and QA process redesign.
- Reduced stakeholder feedback cycles from weeks to days via structured exec syncs, demo cadence, and prioritization frameworks.
- Drive cross-functional alignment across Product, Engineering, QA, and Customer Support for enterprise client outcomes and production readiness.
- Support operating rhythm, capacity planning, and performance cadence for a multi-disciplinary India delivery organization.

Saytum Technologies Pvt Ltd

Senior Product Consultant

April 2021 - June 2023 (2 years 3 months)

Bhilai

- Owned product strategy for a B2B SaaS marketplace platform supporting high-volume, transaction-heavy enterprise workflows.
- Defined product workflows, business rules, and system architecture, service matching, partner onboarding, and allocation logic.
- Authored PRDs, functional specs, and business logic documentation from MVP through production releases.
- Built roadmap aligned to business goals, prioritizing by customer impact, revenue leverage, and engineering capacity.
- Partnered with engineering on journey optimization, release planning, and UAT to improve conversion and platform reliability.
- Led stakeholder workshops and process audits to reduce requirement ambiguity and accelerate time-to-market.

Jai Balaji Logitech Private Limited

Product Owner

June 2010 - August 2020 (10 years 3 months)

Delhi, India

- Owned product requirements and workflow design for an enterprise operations platform across multi-location business units.
- Partnered with development teams on specifications, UAT, and production rollouts, improving release predictability.

- Translated business requirements into user flows, business rules, and prioritized feature backlogs.
- Drove continuous improvement through stakeholder feedback, workflow analysis, and data-informed process redesign.
- Bridge between business operations and engineering, improving cross-functional communication and delivery quality.
- Progressed through increasing leadership responsibility over a 10-year tenure, culminating in product ownership at scale.

Education

Pt. Ravishankar Shukla University

Bachelor of Commerce, Business/Commerce, General · (April 2005 - March 2008)
